

JKP

Super Precision Keyless Drill Chuck

- 100% of JKP drill chucks are individually controlled to ensure a maximum total indicator run-out of 0.0016".
- Self-tightening mechanism automatically increases the clamping forces in proportion to the increase in torque during the drilling operation. This prevents tool slippage in clockwise rotation.
- Left hand rotation is available upon request.

CBB

Ball-Bearing Drill Chuck with Key for Production Drilling Equipment

- Drill chuck with key for industrial applications that require the toughest machining conditions.
- Equipped with ball bearings to reduce friction in the tightening mechanism and provide a better grip on the drill shaft.
- All pieces are hardened and ground.
- The one-piece gear ring and sleeve eliminate the possibility of tooth breakage.
- Fits tools up to 1" in diameter.
- Chucks come standard with Jacobs® taper mounts.
